

Inspiring Excellence in Fish Care!

Cool It!

Maintaining a stable aquarium is one of the keys to ongoing success with marine aquariums. The Aqua One Arctic Chiller uses a titanium coil for efficient cooling, with a microprocessor driven digital control unit to make control easy and accurate!

Features & Benefits:

- Super refrigeration can decrease the water temperature rapidly by up to 7-8°C.
- The micro-computerised control system allows easy operation and accurate control.
- The over current and overheat auto protection system make it safe and reliable.
